

You want to exercise and develop your skills in one of Germany's best-known providers of climate metrics and software? Apply now at right. based on science GmbH!

Junior Software Developer (f/m/d)

(from March 2021 / full time / permanent)

We are a provider of climate metrics and software based in the vibrant East End of Frankfurt. With the X-Degree Compatibility (XDC) Model, we developed a tool to calculate the impact a company, a portfolio or any other economic entity has on global warming. The results are expressed as tangible degree Celsius values.

Our multidisciplinary team of over 29 international experts is passionate about acting on climate change by enabling companies to shape their climate strategies and investment decisions in line with the goals of the Paris Climate Agreement. Our aim is to bring maximum transparency on climate-related risks and opportunities to the market and become the standard method for measuring temperature alignment.

In 2020, right.'s work was awarded the German Next Economy Award as well as the Digital Female Leader Award in the category Sustainability for co-founder and CEO Hannah Helmke.

As a fast-growing young company our team is expanding rapidly and we are looking for an engaged and ambitious developer to shape our future with us.

These are your responsibilities:

- You will contribute to defining and driving the future of our software solutions and thus the future of climate-resilient decision-making for our clients.
- You implement new features / bug fixes / refactorings in different parts of the stack (frontend, backend, and DB)
- Learn from your colleagues and offer your insights on all matters that the team works on.
- You take an active role in the Scrum process by helping to shape the sprints and giving feedback to the team.
- Pair-Programming, TDD, code reviews and finding ways to grow together as a team are part of your working routine.

These are your qualifications and skills:

- You are passionate about software development and about acting on climate change both personally and professionally.

Temperature Alignment

right. based on science GmbH
Intzestraße 1, 60314 Frankfurt/Main
info@right-basedonscience.de
right-basedonscience.de

- You have at least 1-2 years of relevant experience in software development and have successfully completed your studies with focus on IT.
- You are a fast learner, resilient and you thrive in a fast-paced environment.
- You have experience with Kotlin, Vue JS (Typescript) or CI/CD and are open to develop in other areas (T-Shape Skillset).
- You are setting high standards for your own work and wanting to constantly develop your skills.
- You have excellent communication skills in English and are open to learn or improve your German.

right. offers you:

- A job with purpose and the opportunity to combine entrepreneurial and environmental aspects.
- Our dynamic work environment provides exciting and challenging tasks as well as a modern Tech-Stack and DevOps: Kotlin (Jooby, Quarkus...), Typescript (Vue), Gitlab, Docker, Kubernetes, SQL and more.
- We are an experienced, multidisciplinary, and international team, passionate about sharing our knowledge and ideas.
- We provide the space you need to do your best work: Join us in our modern loft office in Frankfurt's aspiring East End or from home.
- At right. you benefit from a competitive wage, flexible working hours, and opportunities for further training.

Application

We are looking forward to your application. Send an e-mail with your CV, motivational letter and references to our HR manager Linda Schultze (l.schultze@right-basedonscience.de; 0177 60 16 833). Please note that we only accept applicants with a valid work permit for Germany/Europe.
